

Project Disclosure

1. Project
Oakajee

2. Short project/ transaction description

Together with two partners, Port of Rotterdam is working on the various preparatory works towards a decision to develop the Oakajee port, including a temporary offloading solution. These works will be captured in a report for which we fund 50% of the costs related to the contribution to the report of Port of Rotterdam.

3. Country of investment
Australia

4. Volume

We provide a EUR 250,000 repayable development contribution which will bring the project towards the next development phases which will ultimately lead to financial close.

5. Name client

Havenbedrijf Rotterdam N.V. (Port of Rotterdam) is our counterpart and is the operator of the port of Rotterdam. The Port of Rotterdam cooperates on the works an Australian and a German partner. Each party funds their own costs related to the works.

6. Impact / target SDG's

The construction of the port of Oakajee in general and the floating offloading facility specifically is an important enabler for the evacuation of the hydrogen that will be produced, mainly in for form of green ammonia. The development and operation of the hydrogen production facilities and related infrastructure, including the port and common user infrastructure, has potential contributions to multiple SDGs. Impact contributions to SDG 8 (direct and indirect decent jobs supported) and SDG 13 (absolute and avoided GHG emissions) are the main target for Invest International.

7. Sector
Energy

8. ESG Risk category

C for the feasibility studies under the preparatory works.
