

Project Disclosure

Project: Greenhouse Vietnam

1. **Client/ Project Name:** Orlar International Pty Ltd, Greenhouse Vietnam
2. **Country of Investment:** Vietnam
3. **Sector:** Agri-food
4. **Signing date (date of the main transaction document):** 31 July 2023
5. **Volume:** EUR 750,000
6. **Source of funding:** Development Accelerator Facility
7. **Project description:**

Orlar's mission is to make contaminant-free organic produce accessible. For Vietnam, where the environment has suffered from decades of contamination and pollution, Orlar's ability to produce 'clean' fruits and vegetables in a way that minimizes costs and greenhouse emissions, fills an overwhelming need. Invest International will co-fund the completion of a pilot project, that aims to prove that the combined Dutch high-tech solution together with Orlar technology can successfully produce safe food at low altitudes in the Mekong Delta of Vietnam, resulting in a scaleable product blueprint for the region.

8. **Impact / target SDGs:**

The investment would have substantial development impact, addressing Sustainable Development Goal 2 – Zero Hunger; SDG 8 Decent Work & Economic Growth - and Goal 13 – Climate Action. There are high rates of pesticide induced health consequences in Vietnam, resulting in high demand for imported food. Orlar addresses this problem by producing high-quality safe & sustainably produced food at an affordable price, locally and with Dutch expertise and technology. The pilot will contribute to a number of decent jobs and further strengthen the local economy.

9. **ESG Risk category:** Category C for the pilot
