1. **Client / Project name:** Stichting Flying Swans
2. **Client's website (if available):** [Flying Swans - Developing Supply Chain Projects](#)
3. **Country of Investment:** South Africa, Angola, Kenya, Ethiopia
4. **Sector:** Agri-food
5. **Signing date (date of the main transaction document):** 27 / 10 / 2023
6. **Total Invest Financing:** EUR 4,145,000
7. **Source of funding:** Partnership Development Facility / Impact Accelerator
8. **Project Description**

The importance of Temperature Controlled Logistics (TCL) is widely recognized as a critical enabler of economic development, sustainable trade, and to mitigate food losses. Major SDG impact can be made by TCL, among others SDG 8 (decent work and economic growth), SDG 13 (climate action), SDG 9 (industry, innovation and infrastructure) and SDG 12 (responsible consumption and production). Stichting Flying Swans have worked in the arena of trade corridor development with a focus on TCL as a catalyst for many years and have developed a unique development proposition and capability in this regard.

The development funding provided by Invest International aims to catalyze sustainable and inclusive economic development and the mitigation of climate change (CO₂ reduction) through SDG aligned project development and investment within temperature controlled agro-logistics corridors in emerging economies. In the development process, various expertise are leveraged to co-develop demand led projects within emerging economies, that achieve local social and economic impact while expanding and enabling sustainable trade and supply chains.

9. Impact / target SDGs

- SDG 8 Decent work and Economic Growth: Local development stimulates significant industry development and job creation
- SDG 13 Climate Action: TCL is a vital component in enabling the transition from air to sea freight, thereby reducing CO₂ emissions within the transport and logistics sector

- SDG 12 Responsible Consumption and Production: TCL is a vital value chain component to reduce stock and food losses on farm and during the transportation process
- SDG 9 Industry, innovation and infrastructure: Flying Swans is specialized in greenfield project identification, design, and development, resulting in context applied infrastructure that promote sustainable trade and supply
